- Supported a Microservice to convert CSV/JSON input from upstream systems to letters(pdf, tiff, ps format)

# SKILLS

Programming Languages: Python, SQL, JavaScript, Solidity

Libraries/Frameworks: Pandas, Numpy, Sklearn, Matplotlib Beautifulsoup, Selenium, React

Tools / Platforms: Databrick, Bitbucket, Confluence, JIRA, Jenkins, ServiceNow, Github, Post-

man

Databases: Postgrete, Oracle, MSSQL

## PROJECTS / OPEN-SOURCE

# dApp for NFT Ticketing | Link

Next JS, Solidity

- Deployed smart contracts in the Ethereum network using hardhat framework, utilized a Next JS frontend to allow users to use Metamask to interact with the smart contract in a Web3 fashion
- Hosted the frontend in Fleek(decentralized nodes) and connected with the graph(indexing protocol) to listen to the event emitted under the contracts, stored metadata in InterPlanetary File System(IPFS)

#### F1(Car Racing) Data Pipeline | Link

Python, SQL

• Constructed a data pipeline for F1 data in the Azure environment with components of Azure data lake storage, Azure data factory and Databrick

• Transformed and Load the data using Python and SQL to convert a single CSV to multiple tables with defined schema and partition

## Classfication for Loan Evaluation | Link

Python

- Gathered and analyzed data related to automobile loans and divided the data into training and testing datasets
- Constructed a decision tree via computing the information gain recursively, improved the model performance using Random Forest Algorithms(RFA), and predicted the loan status (Approved/Declined)

## CERTIFICATIONS

- $\bullet$  Azure Data Engineer Associate  ${\bf Microsoft}$
- Azure Data Fundamental Microsoft
- Azure Fundamentals Microsoft
- Azure Databricks & Spark Core For Data Engineers(Python/SQL) Udemy
- SQL (Advanced) Certificate Hackerank
- $\bullet$  Tableau training **SkilUp**
- Certified Scrum Product Owner (CSPO) Scrum Alliance, Inc.
- Professional Scrum Master I Scrum.org
